

NATIONAL EDUCATIONAL ASSESMENT AND EXAMINATIONS AGENCY (NEAEA)
ETHIOPIAN UNIVERSITY ENTRANCE EXAMINATION (EUEE)
BIOLOGY EXAMINTION 2008

BOOKLET CODE: 00

NUMBER OF ITEMS:

SUBJECT CODE: 00

TIME ALLOWED: 00

1. Which of the following food types would most likely give a negative result upon addition of iodine solution?

- A) Bread
- B) Butter
- C) Biscuit
- D) Potato

2. Which process produced mRNA during protein synthesis?

- A) Translation
- B) Replication
- C) Mutation
- D) Transcription

3. What is the molecule in plant cells that first captures the radiant energy from the sun light?

- A) ATP
- B) DNA
- C) Chlorophyll
- D) Carbon dioxide

4. Of the following functions, which one do triglycerides accomplish in cells?

- A) Increase density of tissues and cells
- B) Increase thermal insulation of cells
- C) Yield limited amount of ATP for cells
- D) Facilitate entry of excess water in to cells

5. Which of the following laboratory glassware is used for culturing bacteria?

- A) Petri-dish
- B) Test tube

- C) Filter paper
- D) Measuring cylinder

6. of the following, which one is the main source form which plants get the nutrients necessary for their growth and development?

- A) Light
- B) Chlorophyll
- C) Atmosphere
- D) Soil

7. Which of the following is the correct sequence of the steps in scientific research?

- A) Hypothesis formulation----> Conclusion---->experiment---->question
- B) question----> Hypothesis formulation---->experiment---->Conclusion
- C) Hypothesis formulation---->question ---->experiment---->Conclusion
- D) question---->Hypothesis formulation ---->Conclusion---->experiment

8. Which of the following types of cancer is known to mostly develop in AIDS patients?

- A) Cervical cancer
- B) Stomach cancer
- C) Kaposi's sarcoma
- D) Breast cancer

9. How many fatty acids would a cell need to form a molecule of triglyceride

- A) Two
- B) Four
- C) Five
- D) Three

10. Which part of the human elementary canal contains digestive enzymes that function at acidic pH?

- A) Stomach
- B) Mouth
- C) Esophagus
- D) Small intestine

11. Which of the following is the correct constitution of the sex chromosome of a normal woman?

- A) XY
- B) XX
- C) XO
- D) XXY

12. From which of the following does the O₂ released during the process of photosynthesis originate?

- A) Pyruvic acid

- B) CO₂
- C) Sugar
- D) Water

13. What is the best term that expresses the movement of substances in cells against their concentration gradient?

- A) Active transport
- B) Passive transport
- C) Osmosis
- D) Water

14. In cell division, what is the phase that comes following the metaphase called?

- A) Extraphase
- B) Prophase
- C) Anaphase
- D) Telophase

15. Who was the person that first observed living cells moving around when he examined drops of water under the microscope?

- A) Robert Brown
- B) Robert Hook
- C) Anton van leeuwenhoek
- D) Theodor schwann

16. Which of the following is true about gene mutation?

- A) Altering the DNA sequence of a gene
- B) Change in the position of a block of genes
- C) Addition of genes to a chromosome
- D) Loss of genes from a chromosome

17. What is the circumstance that causes the health condition known as sickl-cell anaemia?

- A) DNA denaturation
- B) Haemoglobin mutation
- C) RNA mutation and decay
- D) Phosphate mutagenesis

18. Based on similarity in number of amino acids found in haemoglobin, which one of the following animals has closer phylogenetic relations to human beings?

- A) Chicken
- B) Horse
- C) Frog
- D) Gibbon

19. In which of the following groups of living organisms do the cells lack organized nuclei?

- A) Fungi
- B) Protozoa
- C) Bacteria
- D) Algae

20. Which one of the following terms refers to the failure of sister chromatids to separate from one another during anaphase?

- A) Non-disjunction
- B) Replication
- C) Deletion
- D) Double inversion

21. If two species are known to belong to the same order ,they must also belong to the same which taxonomic categories?

- A) Class
- B) Family
- C) Species
- D) Genus

22. What happens in first reaction of the Krebs cycle during energy transformation?

- A) A 2-C compound is produced.
- B) A 6-C compound is produced.
- C) A 4-C compound is produced.
- D) A 5-C compound is produced.

23. What do you call structure that have the same evolutionary origin even though they may now have different structural make-ups or functions?

- A) Endemic
- B) Analogous
- C) Homologous
- D) Indigenous

24. For what purpose do biologists use the GPS receiver?

- A) To produce area maps
- B) To measure tree height
- C) To estimate tree ages
- D) To count tree rings

25. Which of the following organisms usually forms the pioneer community in the primary biological succession?

- A) Annual herbs

- B) Lichens
- C) Trees
- D) Ferns

26. In an experiment designed to study the effect of temperature on the rate of seed germination ,which of the following should the experiment vary?

- A) Seed number
- B) Water quality
- C) Temperature
- D) Seed size

27. In the carbon cycle, which of the following processes removes carbon dioxide from the atmosphere?

- A) Respiration
- B) Decomposition
- C) Combustion
- D) Photosynthesis

28. Which of the the following sequences represents the correct change in number of chromosomes during fertilization?

- A) $n+n \rightarrow 2n$
- B) $2n \rightarrow 2n$
- C) $n \rightarrow n$
- D) $2n \rightarrow n+n$

29. "Rats can be produced by keeping rags and grains at a corner of a room". Which of the following thinking supports this statement?

- A) Darwinian evolution
- B) Spontaneous generation
- C) Alternation of generation
- D) Sexual reproduction

30. What is the specific name of biological scientists who do research that tries to find evidence of life on other planets in the solar system?

- A) Neurobiologists
- B) Paleontologists
- C) Astrobiologists
- D) Biogeographers

31. Which of the following industries can reduce more CO₂ emission by shifting to the use of enzyme in the manufacturing process?

- A) Bread making
- B) Cheese making

- C) Leather making
- D) Manufacturing cosmetics

32. Which of the following is made of globular proteins?

- A) Enzyme
- B) Keratin
- C) Collagen
- D) Glycogen

33. Which of the following events happened before all the others?

- A) The cell theory was proposed .
- B) The protozoa were discovered
- C) The compound microscope was invented .
- D) The structure of DNA was discovered.

34. Under what conditions do C_4 plants have more photosynthetic efficiency than C_3 plants?

- A) Low water supply
- B) Low temperature
- C) Low light intensity
- D) Low CO_2 concentration

35. Which of the following is NOT a universal property of all living things?

- A) Heritable characters
- B) Reproduction
- C) Photosynthesis
- D) Growth and development

36. In which area of enzyme application is invertase injected to sucrose paste in order to produce liquid chocolates?

- A) Detergent making industry
- B) pulp and paper industry
- C) Pharmaceutical industry
- D) Food processing industry

37. Which of the following function best at higher optimum pH than all the rest?

- A) Pepsin
- B) Salivary amylase
- C) Trypsin
- D) Enzymes in the stomach

38. Which class of enzymes joins to molecule together by formation of new bonds?

- A) Ligase

- B) Isomerase
- C) Lyase
- D) Hydrolase

39. Which of the following has a bigger size than all the other?

- A) A ribosome taken from animal cell
- B) A mitochondrion take from plant cell
- C) A nerve cell taken from a human brain
- D) A glucose molecule taken from a plant cell

40. How does a simple microscope differ from a compound microscope?

- A) A simple microscope has no lens.
- B) A simple microscope has got two lenses
- C) A simple microscope uses mirror as lens.
- D) A simple microscope has only one lens.

41. Which of the following molecules can serve as a raw material for industries that produce glucose?

- A) Nucleic acids
- B) Proteins
- C) Lipids
- D) Starch

42. In enzymes that contain non-protein organic molecules, in addition to the protein component, what is the protein component called?

- A) Apoenzyme
- B) Coenzyme
- C) Holoenzyme
- D) Cofactor

43. Which of the following should be done in order to remove an enzyme inhibition caused by a competitive inhibitor?

- A) Remove affected enzyme molecule
- B) Add more substrate to the enzyme
- C) Remove the end product of the reaction
- D) Add more inhibitor to the system

44. Which of the following parts of the plant cell is NOT a living component of the cell?

- A) Cell membrane
- B) Cell wall
- C) Cytoplasm
- D) Nucleus

45. What are the possible consequences of deforestation of the tropic rain forest?

- A) An increase in existing ecological niches
- B) Reduction in species diversity of an area
- C) Increased removal of CO₂ from the atmosphere
- D) An increase in the amount of nitrogen in the soil

46. Which of the following processes releases CO₂ in to the atmosphere?

- A) Respiration
- B) Assimilation
- C) Feeding
- D) Photosynthesis

47. If an area is dominated by just one species having very many individuals, what would be its index of diversity?

- A) Fluctuating
- B) High
- C) Low
- D) Unpredictable

48. Which of the following is true about sex determination in birds?

- A) They have heterozygotic X and Y chromosomes
- B) Males have heterozygotic W and Z chromosomes
- C) Females have the homozygotic WW chromosomes
- D) They have the heterozygotic W and Z chromosomes

49. How many amino acids are there in all known proteins?

- A) About 10
- B) About 35
- C) About 20
- D) About 46

50. Which of the following is the major mechanism by which AIDS is transmitted?

- A) Mother to fetal transmission
- B) Hetrosexual intercourse
- C) Homoexual intercourse
- D) contaminated blood transfusion

51. What percentage of the F₂ progeny of a monohybrid cross is expected to have the recessive phenotype?

- A) 100 %
- B) 75 %
- C) 25%

- D) 50 %

52. Which of the following is NOT true about innate behaviours?

- A) Can be improved by trial and error
 B) Common to all members of the species
 C) Present at birth or on hatching
 D) Do not have to be learned

53. To which one the following classes of stimuli do pheromones belong?

- A) Auditory
 B) Smell
 C) Visual
 D) Touch

54. Which of the following types of microscope is most suitable for a detailed study of the surface structure of an object ?

- A) Field microscope
 B) Optical microscope
 C) Scanning electron microscope
 D) Dissecting microscope

55. According to the fluid-mosaic model of the plasma membrane, what does the word 'mosaic' refer to?

- A) The hydrophobic property of fatty acids
 B) The bilayer nature of the membrane
 C) The arrangement of the proteins
 D) The movement of the phospholipids

56. Which of the following diseases is correctly matched with its causative agent?

- A) Malaria - fungus
 B) AIDS - virus
 C) Ringworm - protozoa
 D) Syphilis - worm

57. Which of the following organic compounds would release both nitrogen and sulphur to the ecosystem when decomposed?

- A) Polysaccharides
 B) Sucrose
 C) Proteins
 D) Lipids

58. Among the vertebrate found In ethiopia, which class has the highest percentage of endemic species?

- A) Amphibians

- B) Reptiles
- C) Birds
- D) Mammals

59. Which of the following terms refers to the movement of individual out of a population?

- A) Mortality
- B) Immigration
- C) Emigration
- D) Natality

60. Which of the following crosses will produce progeny with phenotypic ratio of 3:1?

- A) Crossing the F_1 to the dominant parent
- B) Crossing two homozygote individuals
- C) Crossing the F_1 to the recessive parent
- D) Crossing two heterozygote individuals

61. Which of the following changes that happened during human evolution had the most contribution to the evolutionary success of Homo sapience?

- A) Proportionately big brain size to body mass
- B) Big body parts and big overall body mass
- C) Long legs, arms and more upright body posture
- D) Fast running ability and overall physical strength

62. Woodlice are observed avoiding light and heat by quickly moving to moist and darker areas. Which behavior of these animals helps them to detect differences in light intensity and move to the darker and moist part of the habitat?

- A) Instinctive learning
- B) Negative phototaxis
- C) Positive phototaxis
- D) Insight learning

63. In Ethiopia animal diversity ,which group is presented by the highest number of orders, families, genera and species

- A) Birds
- B) Amphibians
- C) Fish
- D) Mammals

64. Why mutations are important in evolution

- A) They are related to the environment.
- B) They contribute to new variation in organisms.
- C) They are always beneficial to the organism

- D) They become causes for species migrations

65. Which of the following processes involved in the water cycle is carried out by green plants?

- A) Evaporation
 B) Precipitation
 C) Condensation
 D) Transpiration

66. Deficiency of which of the following nutrients in human diet is likely to result in deficiency of some co-enzyme like FAD?

- A) Essential amino acids
 B) Vitamins
 C) Carbohydrate
 D) Saturated fatty acids

67. If someone suddenly removes his/her hand from a very hot object, which of the following types of behavior is manifested?

- A) Reflex action
 B) Imprinting
 C) Learned behaviour
 D) Sensitization

68. Which step in the HIV life cycle is disrupted by antiretroviral drug that competitively inhibits the reverse transcriptase enzyme?

- A) Entry into the host cell
 B) Assembly of viral parts in to a virus
 C) Formation of DNA from RNA
 D) Integration of viral DNA into host DNA

69. During which of the following processes in cellular respiration are most of the ATPs formed?

- A) Glycolysis
 B) Chemiosmosis
 C) Link reaction
 D) Krebs cycle

70. Which of the following pairs are ANALOGOUS structures?

- A) The human arm and the front leg of a mule
 B) The front leg of a frog and the wing of a bat
 C) The wing of a bird and the wing of a butterfly
 D) They wing of a bat and the wing of bird

71. Which of the following involves trial and error learning ?

- A) Operant conditioning
- B) Habituation
- C) Sensitization
- D) Classical conditioning

72. Which of the following is the adaptation by C₄ plants that helps them to avoid photorespiration?

- A) Harvesting of carbon dioxide at night
- B) Using separate cells for light and dark reaction
- C) Storing carbon dioxide in the vacuole
- D) Keeping the stomata closed during the day

73. If a codon on a messenger RNA is UUU, what is the complementary anticodon on the transfer RNA?

- A) UUU
- B) GGG
- C) CCC
- D) AAA

74. If a clone is produced by transferring a nucleus of animal A to an enucleated egg of animal B and the egg is then implanted in the uterus of animal C, which animal would the clone resemble most?

- A) Animal C
- B) Animal B
- C) Animal A
- D) Other animal

75. Which of the following classes of fatty acids is without carbon-carbon double bond?

- A) Monosaturated fatty acids
- B) Unsaturated fatty acids
- C) Saturated fatty acids
- D) Polyunsaturated fatty acids

76. Choose the one that had the LEAST contribution to human evolution?

- A) Development of bipedalism
- B) Adaptation to flight
- C) Attaining opposable thumb
- D) increasing brain size

77. In which biome are epiphytes typically present as a characteristics element ?

- A) Tropical montane forests
- B) Cold desert woodlands
- C) The Tundra environment
- D) Boreal deciduous forests

78. If it is known that the total amount of DNA in a cell is 300 units and that adenine contributes 70 of these units, how many units go to cytosine?

- A) 40 units
- B) 70 units
- C) 80 units
- D) 35 units

79. What is the substance that helps to keep the biological membrane in a fluid state?

- A) Waxes
- B) Water
- C) Cholesterol
- D) Phospholipids

80. which of the following substance is NOT formed when yeasts ferment glucose?

- A) Alcohol
- B) ATP
- C) Lactic acid
- D) Carbon dioxide

81. Which phosphate bond of the ATP is broken when the energy it contain is needed for cellular activity?

- A) The first bond
- B) The C- C bond
- C) The second bound
- D)The third bond

82. What is the advantage that a photosystem containing molecules of different types of light sensitive pigments have?

- A) To absorb light of different wavelengths
- B) To increase the size of photosystem
- C) To increase the complexity of the photosystem
- D) To increase the surface area for the light absorption

83. How many years have passed since Darwin's book on the theory of evolution was published?

- A) About 50 years
- B) About 160 years
- C) About 120 years
- D) About 100 years

84. Which of the following can be understood about living things from the study of how breeders improve domesticated plants and animals?

- A) Living things tend to over-reproduce
- B) Natural resources are of limited supply

- C) Living things can be improved through selection
- D) Individuals compete for resources

85. Which of the following is responsible for the bending of a young plant towards a unidirectional source of light?

- A) Reduced photosynthesis on dark side
- B) Faster growth rate on the dark side
- C) Reduced auxin concentration on dark side
- D) Increased rate of cell division on the light side

86. In what way would AIDS patients benefit from the treatment with anti-retroviral drugs?

- A) Reduction of HIV replication
- B) Provision of cure for AIDS
- C) Immunizing against HIV
- D) Killing of opportunistic infections agents

87. If a country has a large number of young people relative to the number of old people, to which category of countries does it belong?

- A) Industrial
- B) Hunter - gatherer
- C) Post - industrial
- D) Developing

88. Which of the following is the best collective name for all bacteria with spherical shape?

- A) Spirochaetes
- B) Bacilli
- C) Cocci
- D) Streptococci

89. Suppose two heterozygous round yellow ($RrYy \times RrYy$) pea plants were crossed and 128 seeds were produced, how many of the seeds are expected to be heterozygous around yellow?

- A) 64 seeds
- B) 32 seeds
- C) 96 seeds
- D) 128 seeds

90. Which of the following way is an important way by which green plants mitigate the green house effect?

- A) Use of fire wood to replace coal
- B) Remove CO_2 from the atmosphere
- C) Releasing water to the atmosphere
- D) Releasing oxygen to the atmosphere

91. What causes tomato fruits to ripen much more slowly when kept in a refrigerator than if left on a table at room temperature?

- A) Low temperature slows the normal action of ripening enzymes.
- B) Enzymes produced by bacteria normally inhibit ripening.
- C) Humidity accelerates enzyme activity and ripening process.
- D) Normal temperature arrests the action of ripening enzymes.

92. Which characteristics of RNA makes it suitable for moving out of the nucleus?

- A) Inability to replicate
- B) Absence of thymine
- C) Its unstable nature
- D) Smallness of its size

93. Why does sucrose give a negative result when mixed and heated with Benedict's solution?

- A) Because it is not a sugar molecule.
- B) Because it is a reducing sugar.
- C) Because it is a non-reducing sugar.
- D) Because it is not a monosaccharide.

94. What does an evolutionary selective pressure that acts around the mean do?

- A) It stabilizes
- B) It terminates
- C) It converges
- D) It disrupts

95. Which of the following is consistent with science?

- A) Proof by investigation of the causes of a phenomenon
- B) Proof by reference to a respected leader
- C) Proof by reference to an unknown object
- D) Proof based on lessons from a person one believe

96. In his theory of evolution, the cause of which of the following concepts was MISSING in Darwin's explanation

- A) Ove-reproduction
- B) Struggle for survival
- C) Hereditary variation
- D) Survival of the fittest

97. which of the following is a learned behaviour?

- A) Suckling of the newborn at mothers breasts
- B) Salivation by conditioned dogs at the sound of a bell

- C) Withdrawal of hands suddenly from hot objects
- D) Blinking the eyes when something gets into them

98. Which of the following diseases is transmitted by mosquitoes?

- A) Diabetes mellitus
- B) Kaposi's cancer
- C) Rabies
- D) Malaria

99. In which of the following are all the tools mainly used in the laboratory rather than in the field situation?

- A) Centrifuge, microscopes, measuring cylinder, petri dishes
- B) Flow meters ,centrifuge, theodolites, microscopes
- C) Centrifuges, plant presses, flow meters, microscopes
- D) Theodolites, petri dishes, GPS receivers ,measuring cylinder

100. Which aspect of biotechnology is considered strictly genetic engineering?

- A) Providing gene therapy
- B) Production of new types of plants
- C) Monoculture antibodies
- D) Mapping of the human genome

Submit
