

NATIONAL EDUCATIONAL ASSESMENT AND EXAMINATIONS AGENCY (NEAEA)
ETHIOPIAN UNIVERSITY ENTRANCE EXAMINATION (EUEE)
BIOLOGY EXAMINTION 2009

BOOKLET CODE: 00

NUMBER OF ITEMS:

SUBJECT CODE: 00

TIME ALLOWED: 00

1. The word science comes from the Latin word 'Scientia' meaning what ?

- A) Study
- B) Experiment
- C) Life
- D) Knowledge

2. Which of the following substance can be used over and over again in an enzyme catalyzed reaction?

- A) Enzyme -substrate complex
- B) Substrate
- C) Enzyme
- D) Reaction product

3. What is the intermediate compound that is formed during an enzyme catalyzed reaction?

- A) Reaction
- B) Substrate
- C) Product
- D) Enzyme-substance complex

4. Which of the following microorganisms are prokaryotic?

- A) Bacteria
- B) Protozoa
- C) Yeast
- D) Algae

5. Which of the following laboratory tools is LEAST accurate to measure 1 ml of liquid?

- A) Pipette
- C) Burett

- B) Measuring cylinder
- D) Beaker

6. From which of the following diseases can one be protected by sleeping under the cover of a mosquito net?

- A) Sleeping sickness
- B) AIDS
- C) Malaria
- D) Athlete's foot

7. Which of the following parts of the flower did Mendel remove from young flowers to prevent self-population ?

- A) Stamens
- B) Sepals
- C) Petals
- D) Ovaries

8. What do we call the place where organisms live in their ecosystem ?

- A) Abiotic
- B) Biotic
- C) Habitat
- D) Niche

9. Which of the following is the sex chromosome constitution of human males?

- A) XX
- B) XY
- C) ZZ
- D) ZW

10. Which of the following plants use CAM photosynthesis?

- A) Sugarcane
- B) Sorghum
- C) Maize
- D) Cactus

11. Which of the following bases is NOT found in RNA?

- a) Adenine
- B) Guanine
- C) Cytosine
- D) Thymine

12. In a report of the scientific experiment description of which of the following comes before all the others?

- A) Procedure

- B) Results
- C) Hypothesis
- D) Conclusion

13. Which one of the following is different from the other three?

- A) Starch
- B) Glycogen
- C) Cellulose
- D) Maltose

14. What happens when a plant cell absorbs in more water?

- A) It shrinks
- B) It becomes turgid
- C) It becomes wilted
- D) It swells and bursts

15. Which level of protein structural organization involves two or more polypeptide?

- A) Primary structure
- B) Secondary structure
- C) Tertiary structure
- D) Quaternary structure

16. Which of the following do biologists consider ancestral to the higher organisms of today?

- A) Plantae
- B) Animalia
- C) Fungi
- D) Protista

17. Which type of fatty acids is healthier when used as a human food source?

- A) Saturated fatty acids
- B) Mono unsaturated fatty acids
- C) Polyunsaturated fatty acid
- D) Fatty acids in animal products

18. Which of the following is NOT recycled in the ecosystem?

- A) Sulphur
- B) Energy
- C) Carbon
- D) Phosphorus

19. What kind of cross is performed to determine whether the parent was homozygous or heterozygous ?

- A) Mono hybrid cross

- B) Di-hybrid cross
- C) Back cross
- D) Double cross

20. Which type of animal behavior happens with out learning?

- A) Innate
- B) Latent
- C) Insight
- D) Conditioned

21. Which drop of iodine solution is added to a solution of a foodstuff and the foodstuff turns dark blue what dose the foodstuff contain

- A) Reducing sugar
- B) Disaccharide
- C) Glucose
- D) Starch

22. Which of the following has the highest risk of HIV transmission?

- A) Hand shaking
- B) Needle sharing
- C) Towel Sharing
- D) Toilet Sharing

23. Which of the following elements is the most abundant in living things?

- A) Nitrogen
- B) Carbon
- C) Hydrogen
- D) Oxygen

24. Which of the following organelles is common to both plant and animal cells?

- A) Cell wall
- B) Chloroplast
- C) Mitochondria
- D) Central vacuole

25. Among the following organic molecules, identify the one that dose not contain nitrogen.

- A) Starch
- B) Protein
- C) DNA
- D) RNA

26. If a cell fails to form lysosomes, which of the following cellular functions will get disturbed first?

- A) Protein synthesis
- B) Chromosome replication
- C) Removal of cellular debris
- D) Transport across cell membrane

27. Most co-enzymes are the derivatives of which of the following enzymes would one use?

- A) Proteins
- B) Vitamins
- C) Carbohydrates
- D) Fats

28. To produce from starch, which of the following enzymes would one use?

- A) Isomerases
- B) Lyases
- C) Hydrolases
- D) Ligases

29. Which class of enzyme inhibitors has similar shape as that of the normal substrate?

- A) Allosteric
- B) Competitive
- C) Denaturing
- D) Irreversible

30. For a substance to easily pass across the cell membrane by simple diffusion which of the following properties should it possess?

- A) Large size
- B) Ability to dissolve in lipid
- C) Positive charge
- D) Negative charge

31. Among the following factors that affect enzyme activity, which one does NOT cause enzyme denaturation?

- A) High pH
- B) Low pH
- C) High temperature
- D) Competitive inhibitor

32. Which of the following is a type of ecological succession that starts from a cleared forest area?

- A) Hydrosere
- B) Primary
- C) Secondary
- D) Pioneer

33. Which of the following stage of photosynthesis can take place in the dark?

- A) Photolysis of water
- B) Photosystem I
- C) Photosystem II
- D) Calvin cycle

34. Which of the following is the major role-played by bacteria and fungi in the ecosystem?

- A) Causing diseases
- B) Nutrient recycling
- C) Fixing carbon dioxide
- D) Producing antibiotic

35. If a heterozygous tall pea plant (Tt) is crossed with a short pea plant(tt) ,what percentage of the progeny is expected to be short?

- A) 100%
- B) 75%
- C) 50%
- D) 25%

36. Which of the following human cell types is attacked by HIV?

- A) Red blood cells
- B) White
- C) T- lymphocytes
- D) Leukocytes

37. Which of the following processes is most important to release nutrients from dead organic matter in to the soil?

- A) Fixation
- B) Decomposition
- C) Excretion
- D) Respiration

38. Which of the following biomes supports the highest diversity of plant and animal life?

- A) Tropical rain forest
- B) Deciduous forest
- C) Grassland
- D) African savannah

39. Which of the following demographic factors can increase the size of the world population?

- A) Natality
- B) Migration

- C) Emigration
- D) Immigration

40. When Mendel crossed a tall pea plant with a short plant the F_1 progeny were all tall what F_1 did he obtain when he made the reciprocal cross?

- A) Short plants
- B) Tall plants
- C) Extra-tall plants
- D) Plants of average height

41. Among the following ABO blood group genotype, which one produces two types which one produces two types of antigens?

- A) $I^A I^O$
- B) $I^B I^O$
- C) $I^A I^B$
- D) $I^B I^B$

42. Which of the following methods do animal breeders use to produce domestic animals with hybrid vigor?

- A) Feeding with nutritive food
- B) Mating together related animals
- C) Giving proper veterinary care
- D) Crossbreeding their animals

43. Which of the following groups are believed to be the first photosynthetic organisms to evolve on earth?

- A) Green plants
- B) Green algae
- C) Blue green algae
- D) Lichens

44. Which of the following factors brings about changes during both evolution and breeding of plants and animals?

- A) Limited resources
- B) Production of excess progeny
- C) Selection
- D) Competition

45. Among the following which one is held most responsible for the present fast depletion of the world biodiversity ?

- A) Herbivores
- B) Carnivores
- C) Grazers
- D) Humans

46. Which of the following reproductive isolating mechanisms keeps the horse and donkey as two independent species?

- A) Hybrid inviability
- B) Hybrid infertility
- C) Ecological isolation
- D) Habitat isolation

47. Which of the following activities of an organism do we call a behavior ?

- A) Reception of external stimulus
- B) Responding of internal stimulus
- C) Responding of stimulus
- D) Lack of receptors to receive stimulus

48. A reflex that involves internal organs such as the heart is referred to as:

- A) Somatic reflex
- B) External reflex
- C) Spinal reflex
- D) Autonomic reflex

49. At which of the following generation of crosses between dominant and recessive homozygote parents are all the progeny heterozygote?

- A) P₁ generation ?
- B) \blacklozenge F₁ generation \blacklozenge
- C) \blacklozenge F₂ generation
- D) F₃ generation

50. Which of the following organs serves as a coordinating system in a reflex action?

- A) Spinal cord
- B) Dehydrogenase
- C) Nerve cells
- D) Oxidoreductase

51. Which type of enzyme catalyzes the joining of two molecules by the formation of new bonds?

- A) Decarboxylase
- B) Dehydrogenase
- C) Ligase
- D) Oxidoreductase

52. Which of the following statement about enzyme is NOT correct?

- A) Enzymes speed up on a chemical reaction
- B) Enzymes are very specific in their reaction

- C) The presence of an enzyme will change the outcome of a reaction
- D) Enzymes lower the energy of activation for a reaction to occur

53. Glycolysis occurs in the

- A) Cytoplasm
- B) Mitochondrion
- C) Nucleus
- D) Chloroplast

54. Anaerobic metabolism refers to the generation of ATP:

- A) Without the involvement of ADP
- B) Without the use of glycogen
- C) Without the use of oxygen
- D) by the conversion of pyruvate to lactate

55. The conversion of one molecule of glucose to two molecule of pyruvate results in the net formation of:

- A) Two molecule of ATP
- B) Six molecules of water
- C) Three molecules of ATP
- D) Thirty -eight molecules of ATP

56. During alcohol fermentation pyruvic acid in the presence of pyruvate decarboxylase is first converted to.

- A) Glucose
- B) Lactose
- C) Lactic acid
- D) Acetaldehyde

57. The total amount of living tissue within a given trophic level is called:

- A) Organic mass
- B) Energy mass
- C) Trophic mass
- D) Biomass

58. Biomes where trees predominant are called

- A) Polar biomes
- B) desert biomes
- C) Trophic mass
- D) Grassland biomes

59. The goals of biodiversity conservation include all of the following EXCEPT

- A) Protecting individual species
- B) Introducing exotic species in to new environments efforts

- C) Preserving habitats and ecosystem
- D) making sure local people benefit from conservation efforts

60. The maximum population growth rate characteristic of a species is called ⇄

- A) limiting factor
- B) biotic potential
- C) carrying capacity
- D) exponential growth pattern

61. from among the following choice the field which is a branch or a part of biotechnology.

- A) parasitology
- B) Immunology
- C) Phycology
- D) Genetic engineering

62. which of the following is publicly an UNDESIRED research activity

- A) breeding a new crop variety
- B) synthesis of a new vaccine
- C) manufacture of a new effective medicine
- D) breeding a new pathogenic microorganism

63. which of the following alternatives contain ONLY organic molecule?

- A) calcium carbonate, glucose, methane
- B) carbon dioxide, sodium chloride, lysine
- C) linoleic acid, glycine, methane
- D) water, carbon dioxide, calcium carbonate

64. which test is suitable for checking the presence of lipids in foodstuffs ?

- A) buiret test
- B) bendect's test
- C) emulsion test
- D) iodine test

65. How do heavy metal ions reduce the reaction rate of enzymes?

- A) by distroying the 3- dimensional shape of the enzymes active site
- B) by raising the temperature above the optimum level for the enzyme
- C) by dropping the PH well below the optimum level for the enzyme
- D) by inducing mutation that disrupt the functioning of the enzyme

66. What happens when enzymes become denatured?

- A) They can normally catalyzed the reductions
- B) their active sites are changed

- C) rate of the reaction increase
- D) bonds holding amino acids are unaffected

67. What happens when human red blood cells are kept in a hypertonic solution ?

- A) the same net gain and loss of water
- B) more water gets into the cell than leaving it
- C) more water goes out of the cell than getting in
- D) the cell prevents water from getting in or leaving out

68. Among the following which one best describes the cell of bacteria?

- A) Eukaryotic
- B) Prokaryotic
- C) Both eukaryotic and prokaryotic
- D) Neither prokaryotic nor eukaryotic

69. Which of the following nitrogenous bases of nucleic acids is a purine base?

- A) Adenine
- B) Cytosine
- C) Thymine
- D) Uracil

70. Which of the plants with the following genotype is heterozygous?

- A) BBYY
- B) BbYb
- C) bbyy
- D) YYBB

71. Which of the following groups of viruses copy their RNA to DNA?

- A) Bacteriophages
- B) DNA viruses
- C) RNA viruses
- D) Retroviruses

72. Which of the following can reverse an enzyme inhibition that is caused by an allosteric inhibitor?

- A) Adding more substrate
- B) Adding more end product
- C) Depleting the end product
- D) Depleting the substrate

73. During the Krebs cycle, to which of the following molecule is most of the energy released from food transferred?

- A) ATP

- B) NAD
- C) ADP
- D) AMP

74. If in a DNA molecule consisting of 1000 base pairs, there are 300 adenine bases, how many guanine bases will be present?

- A) 200
- B) 400
- C) 600
- D) 700

75. During which stage of aerobic respiration does oxidative phosphorylation occur?

- A) Glycolysis
- B) Krebs cycle
- C) Link reaction
- D) Chemiosmosis

76. What mode of feeding do soil organisms that release nutrients from dead organic matter into the soil have?

- A) Photoautotrophic
- B) Saprophytic
- C) Chemoautotrophic
- D) Parasitic

77. When farmers are using fewer and fewer number of crop varieties, what would happen to the genetic diversity of our crop plants?

- A) It would get eroded
- B) It would be more conserved
- C) It would be more diverse
- D) Nothing would happen to it

78. During anaerobic respiration, what is the gross number of ATP molecules that are produced per glucose molecule?

- A) Two
- B) Three
- C) Four
- D) Six

79. Among the following four processes, identify the one that probably evolved before all the other three.

- A) Aerobic respiration
- B) Anaerobic respiration
- C) Oxidizing atmosphere

- D) Photosynthesis

80. Which of the following is NOT a learned behavior?

- A) Imprinting
 B) Habituation
 C) Conditioning
 D) Trial and error

81. If an actively growing seedling is kept horizontally, which of the following would eventually happen to the seedling?

- A) The shoot would bend upward
 B) The root would bend upward
 C) The seedling would stop growing
 D) The seedling would grow horizontally

82. Which of the following was the most possible mode of evolution by which the many species of Darwin's finches evolved on the Galapagos Islands?

- A) Phyletic evolution
 B) Divergent evolution
 C) Convergent evolution
 D) Sympatric evolution

83. For which of the following processes is ATP NOT required?

- A) Diffusion of oxygen in to cells
 B) Synthesis of molecules
 C) Active transport of molecules from one site to another
 D) Muscle contraction

84. Mutation may be described as:

- A) Phenotypic change
 B) Change in gene structure
 C) Continuous variation
 D) Change due to hybridization

85. Which of the following is the most UNLIKELY action that would be expected from Ethiopians who have been given adequate biological literacy?

- A) Engagement in activities resulting in biodiversity loss
 B) Supporting activities concerned with food security
 C) Awareness about climate change and its problem
 D) Engagement in biological resources conservation

86. Which form of mutation is responsible for the diseases known as leukemia?

- A) Duplication
- B) Insertion
- C) Inversion
- D) Deletion

87. Which of the following characteristic can show the evolutionary relationships among organisms?

- A) Structure having similar functions
- B) Presence of analogous structures
- C) Presence of homologous structures
- D) Structure having different origins

88. Which of the following species isolating processes could lead to the evolution of a new species by the mechanisms known as sympatric speciation?

- A) A river that change its course for many years
- B) A new mountain range that was created many years
- C) population of a species having different breeding seasons
- D) A land mass that separated two water bodies for many years

89. What is an apoenzyme?

- A) A protein molecule
- B) An active enzyme
- C) A non- protein molecule
- D) A non- protein cofactor

90. For which of the following can divergent evolution be taken as an alternative name?

- A) Allopatric speculation
- B) Adaptive radiation
- C) Stabilizing selection
- D) A non- protein cofactor

91. Which one of the following is the result of the similarity observed between the wings of a bird and a pterodactyl?

- A) Convergent evolution
- B) Directional selection
- C) Stabilizing selection
- D) Divergent evolution

92. Which of the following played an important role in the evolution of human being?

- A) Emergency of wings in addition to limbs
- B) Development of even toes in the forearms
- C) Development of feathers and hallow bones
- D) Development of opposable thumb to grasp

93. In which one of the following do we use genetically modified bacteria for purpose other than human health?

- A) Production of insulin
- B) Production of antibiotics
- C) Production of herbicides
- D) Production of vaccines

94. which knowledge about cell biology scientists discover after all the others?

- A) The first understanding that all living things are made of cells
- B) Knowledge about how chromosomes behave during mitosis
- C) First understanding about the double helix structure of DNA
- D) First understanding about the DNA sequence in human genome

95. Which of the following statements can be considered as the better definition of the biological concept of behavior?

- A) The reaction of a person or an animal in response to an external or internal stimulus
- B) The responses or reactions or movements that a living plant makes in any situation
- C) A system of coordinated response by an organism to an external or internal stimulus
- D) A receptor of some kind of stimulus that an organism has which produces a response

96. To which category of behavior does the human behavior that involves the strengthening of existing responses or the formation of new responses to existing stimuli that occur because of practice or repetition belong?

- A) Learned behavior
- B) Instinctive behavior
- C) Innate behavior
- D) Inborn behavior

97. Which of the following is NOT grouped under genetically pre-programmed pattern of behavior?

- A) Reflex actions in humans
- B) Orientation behavior
- C) Conditioned behavior
- D) Instinctive behaviors

98. Which group of bacteria reduces nitrate to nitrogen gas in th nitrogen cycle?

- A) Nitrogen fixing bacteria
- B) Ammonium ion forming
- C) Denitrifying bacteria
- D) photosynthetic bacteria

99. The main factors that determine the types of terrestrial biomes in a certain geographical area are:

- A) Soil and vegetation

- B) Soil and biological diversity
- C) Complexity in ecological succession
- D) Precipitation & temperature

100. In which parts of Ethiopian are Lions, Elephants, & Giraffes found more community?

- A) In the afroalpine and subafroalpine zones
- B) In the highland areas of northern Ethiopian
- C) In the grasslands of southwestern Ethiopian
- D) In central and northern parts of the rift valley
