

NATIONAL EDUCATIONAL ASSESMENT AND EXAMINATIONS AGENCY (NEAEA)
ETHIOPIAN UNIVERSITY ENTRANCE EXAMINATION (EUEE)
BIOLOGY EXAMINTION 2010

BOOKLET CODE: 00

NUMBER OF ITEMS:

SUBJECT CODE: 00

TIME ALLOWED: 00

1. Which of the following tools is used by a biologist to study the internal anatomy of experimental animals?

Not Answered

- A) Dissecting kit ✓
- B) Hand lens
- C) Petri dish
- D) Microscope

2. Which of the following is NOT a characteristic of an enzyme? Not Answered

- A) It is a globular protein
- B) It function as a catalyst
- C) It lowers the energy of activation
- D) It converted to products ✓

3. Who was the first person who believed to have seen moving cells under a microscope? Not Answered

- A) Robert Hooke
- B) Rene Dutrochet
- C) Anton van Leeuwenhoek ✓
- D) Theodor Schwann

4. Why do micro-organisms decompose dead organic matters? Not Answered

- A) To release mineral nutrients for the plants
- B) To clean up the ecosystem
- C) To drive energy for their own uses ✓
- D) To keep the balance of atmospheric gases

5. The practice of modern agriculture that reduces crop biodiversity is: Not Answered

- A) Overgrazing
- B) Forest clearing

- C) growing land races
- D) growing few high yielding varieties✓

6. Which one of the following is the best scientific approach to come to conclusive evidence showing that a given event is caused by a certain factor? Not Answered

- A) Having a strong belief
- B) Making a good guess
- C) Making a good guess✓
- D) Conducting an experiment

7. Of the following organic molecules which one includes a pentose sugar? Not Answered

- A) Glucose
- B) Fructose
- C) Galactose
- D) Deoxyribose✓

8. What do enzymes do to a chemical reaction that allows it to proceed optimally? Not Answered

- A) It lowers the required activation energy .✓
- B) It increases the amount of the substrate.
- C) It increases the required activation energy .
- D) It modifies both the pH and the temperature.

9. Which of the following is lacking in prokaryotic cells? Not Answered

- A) Cytosol
- B) Ribosome
- C) DNA strand
- D) Cellulose✓

10. What is the name of a major group of eukaryotic organisms that obtain their nutrition using extracellular digestion? Not Answered

- A) Viruses
- B) Bacteria
- C) Fungi✓
- D) Algae

11. What kind of nutrition do most of the decomposers have in general? Not Answered

- A) Autotrophic nutrition
- B) Saprotrophic nutrition✓
- C) Endosymbiotic nutrition
- D) Chemosynthetic nutrition

12. To which genus of primates are the Neanderthal humans classified? Not Answered

- A) The genus Ardipithecus
- B) The genus Australopithecus
- C) The genus homo ✓
- D) The genus Zinjanthropus

13. In which of the following is there a MISMATCH between the type of innate behavior and the resulting action/response? Not Answered

- A) Instinctive behavior- imprinting in birds
- B) Reflex action- blinking of the eyes in humans
- C) Instinctive behavior- Nest-building in birds ✓
- D) Presentational movement-weaving a web in spiders

14. Cells were first seen using the microscope by: Not Answered

- A) Schleiden
- B) Robert Hooke ✓
- C) Schwann
- D) Leeuwenhoek

15. The ultimate source of genetic variation is: Not Answered

- A) Mutation ✓
- B) Migration
- C) Genetic drift
- D) Selection

16. Which of the following is the first step in starting a research process? Not Answered

- A) Searching sources of information to locate problem.
- B) Survey of related literature
- C) Identification of problem ✓
- D) Searching for solution to the problem

17. For which of the following purpose is GLOBAL positioning system (GPS) used? Not Answered

- A) Map of an area ✓
- B) Theodolite
- C) Microwave
- D) Satellite signal

18. Which of the following statement is INCORRECT with respect to an enzymes ability to catalyze a reaction? Not Answered

- A) An enzyme provide a reaction surface and a hydrophilic environment for the reaction to take place .
- B) An enzyme birds reaction such that they are positioned correctly and can attain their transition-state configurations.

- C) An enzyme allows the reaction to go through a more stable transition state than would normally be the case. ✓
- D) An enzyme can weaken bonds in reactants through binding process

19. The amount of organic matter present at a given time per unit area is called? Not Answered

- A) Carbon sequestration
- B) Standing crop
- C) Carbon foot print
- D) Productivity ✓

20. In the energy pyramid, which group of organisms has least amount of energy? Not Answered

- A) Primary producers
- B) Tertiary producers
- C) Herbivores
- D) Animals ✓

21. The sets in which scientists usually conduct two or more sets of the same experiment at the same time is:

Not Answered

- A) Experimental group ✓
- B) Experimental design
- C) Replication
- D) control group

22. Which of the following properties of water makes sweat a good body coolant? Not Answered

- A) Its strong surface tension
- B) Its low density in the solid state
- C) Its strong adhesion to a surface
- D) Its high heat of vaporization ✓

23. How many molecule of glycerol and fatty acids, respectively, are needed to form 100 molecules of triglyceride fat? Not Answered

- A) 50 and 50
- B) 100 and 100
- C) 100 and 300 ✓
- D) 150 and 400

24. In a metabolic pathway(A-->B-->C-->D) where each step is catalyzed by a separate enzyme which substance in the pathway serves as an allosteric regulator? Not Answered

- A) Substance A
- B) Substance B
- C) Substance C
- D) Substance D ✓

25. Which of the following organelles settles out last when homogenized cells are centrifuged? Not Answered

- A) Chloroplast
- B) Nucleus
- C) Mitochondria
- D) Ribosome ✓

26. At which stage is most of the carbon dioxide released during aerobic respiration? Not Answered

- A) Glycolysis
- B) Kreabs cycle ✓
- C) Electron transport
- D) Chemiosmosis

27. One of the following groups of plants carry out light dependent and ligh independent reactions of photosynthesis in separate cells of the leaf . Not Answered

- A) Plants adapted to temperature regions
- B) Carbon -3 plants
- C) Carbon -4 plants ✓
- D) Cacti

28. What is the nutritional mode of those bacteria which decompose dead organic matter and thus recycle nutrients? Not Answered

- A) Auto trophic
- B) Parasitic
- C) Saprobiotic ✓
- D) Symbiotic

29. In what main way do retroviruses such as HIV differ from other types of RNA viruses ? Not Answered

- A) They require a host cell to reproduce
- B) They reversely copy RNA to DNA ✓
- C) Their genes are resistant to mutation
- D) They are free living viruses

30. Which of the following is NOT true about the flow of energy in the ecosystem? Not Answered

- A) It is recycled by decomposer. ✓
- B) It passes from one trophic level to the next.
- C) It enters the ecosystem in the form of light.
- D) It leaves the ecosystem in the form of heat.

31. Through which of the following processes do all living organisms contribute to carbon cycle?

Not Answered

- A) Photosynthesis

- B) Cellular respiration ✓
- C) Decomposition
- D) Combustion

32. In ecological context which of the following is a population ? Not Answered

- A) All living organisms in a habitat
- B) All the producers in a habitat
- C) All individuals of same species in a habitat
- D) All the consumers in a habitat ✓

33. During meiosis, which processes makes the four chromatids of a homologous pair of chromosomes genetically different from one another? Not Answered

- A) Independent assortment
- B) Crossing over
- C) Segregation ✓
- D) Linkage

34. One of the following is NOT true about protein synthesis in eukaryotes. Not Answered

- A) Translation takes place in the cytoplasm
- B) Transcription takes place in the nucleus
- C) Both Transcription and translation takes place in the cytoplasm
- D) mRNA is modified after transcription ✓

35. Which of the following combinations is known as Neo-Darwinism? Not Answered

- A) Natural selection and acquired inheritance
- B) Acquired inheritance and Mendelian law of inheritance ✓
- C) Natural selection and Lamarck's theory of evolution
- D) Natural selection and Mendelian law of inheritance

36. In the process of allopatric speciation, which of the following is the mechanism that prevents populations from exchanging genes? Not Answered

- A) Polyploidy
- B) Geographic barrier ✓
- C) Seasonal isolation
- D) Temporal isolation

37. A boy who had seen a snake crossing his way earlier jumped up violently when grass touched his legs. Which behavior is it? Not Answered

- A) Habituation
- B) Sensitization
- C) Conditioning ✓

D) Imprinting

38. What material do microbiologists use to culture bacteria in the laboratory? Not Answered

A) Moist soil ✓

B) The royal jelly

C) Agar nutrient

D) Mixture of iodine and sugar

39. Which of the following is usually taken as a signal for the final stage of HIV infection? Not Answered

A) Signs of the disease Kaposi's sarcoma

B) Outbreak of some genetic diseases

C) Uninfected T- helper cells present ✓

D) No infection by other parasitic diseases

40. Though which process can inorganic ions from the soil be absorbed in to the root hairs? Not Answered

A) Dehydration

B) Diffusion

C) Active transport

D) Osmosis ✓

41. How are organic molecules distinguished from inorganic molecules? Organic molecules always contain:

Not Answered

A) Oxygen and hydrogen

B) Carbon and oxygen

C) Oxygen and nitrogen

D) Carbon and hydrogen ✓

42. In which industrial enzyme technology is lactase practical applied to produce lactose-free milk for used by lactose intolerant individuals? Not Answered

A) Chocolate manufacturing industry

B) Human hormone manufacturing industry

C) Dairy product manufacturing industry ✓

D) Cereal food manufacturing industry

43. Which kind of enzyme inhibitors bind to enzyme only weakly and the bond that hold them breaks easily releasing the inhibitor to allow the enzyme to become active again? Not Answered

A) Irreversible inhibitors

B) Reversible inhibitor ✓

C) Inhibitors that bind strongly to enzymes

D) Inhibitors that permanently alter enzyme structure

44. Of the following models describing the nature of the cell membrane, which one was proposed before all the others? Not Answered

- A) The sandwich model
- B) Fluid mosaic model
- C) The unit membrane model
- D) Phospholipid bilayer model ✓

45. Why is that longer races by athletes must be run slower than shorter than shorter races? Not Answered

- A) To give time for lactic acid fermentation in muscle cells
- B) To avoid hunger as food is quickly converted to energy
- C) To allow aerobic respiration to produce the required ATP ✓
- D) To adapt to the weather condition at the racing place

46. In which organ of the human body are more bacteria found? Not Answered

- A) Lungs
- B) Stomach
- C) Small intestine
- D) Large intestine ✓

47. From which group of micro-organisms was the first antibiotics produced ? Not Answered

- A) Gram-negative bacteria
- B) Gram-positive bacteria
- C) Fungal organism ✓
- D) Viral agents

48. What is the other name for the primary consumers of the ecosystem? Not Answered

- A) Herbivores ✓
- C) Carnivores
- C) Green plants
- D) Predators

49. Of the following activities which one is considered to have an indirect negative effect on biodiversity?

Not Answered

- A) Human and livestock population growth
- B) Charcoal making and illegal logging
- C) Deforestation for cultivation and urbanization
- D) Mono culture farming with improved crop varieties ✓

50. If two heterozygous tall pea plants are crossed, how many of the offspring would be phenotypically tall plants? Not Answered

- A) 0%

- B) 25%
- C) 50%
- D) 75% ✓

51. How can biotechnology be applied to reduce the use of inorganic fertilizers in agriculture? Not Answered

- A) By using the golden rice and producing organic fertilizers from betacarotenes
- B) By using thermostable enzyme of genetically engineered bacteria used in washing powders
- C) By selecting and propagating varieties with high growth rates and high productivity. ✓
- D) By using enzyme produced by genetically engineered bacteria used in the food industry

52. Which of the following feature do analogous structures mostly share? Not Answered

- A) Phylogenetic similarity
- B) Development
- C) Ancestral similarity
- D) Functional similarity ✓

53. In which of the following ways dose learned behavior differ from innate behavior? Not Answered

- A) Learned behavior is adaptive in nature .
- B) Learned behavior is genetically determined.
- C) Learned behavior is modified by new experiences . ✓
- D) Learned behavior is functional at the first attempt.

54. Current human concerns such as famine, pestilence, and environmental degradation would be solved through the use of: Not Answered

- A) Biological principles ✓
- B) Irrigation
- C) Aquaculture
- D) Terracing

55. The best way to control HIV/AIDS is: Not Answered

- A) Adequate distribution of condoms
- B) Adequate distribution of antiviral drugs
- C) Breaking the transmission pathway
- D) Awareness creation ✓

56. Which is the possible effect of the weak hydrogen bond among water molecules? Not Answered

- A) It helps water to boild at low temperature
- B) It results in the crystal shape of ice ✓
- C) Plays a significant role in the interaction of a water molecule with hydrophobic surfaces
- D) It speeds up photosyntheses is

57. Cell organelles that contain hydrolytic enzymes are called: Not Answered

- A) Peroxisomes
- B) Lysosomes
- C) Mesosomes
- D) Ribosomes

58. Which part of the cell makes necessary changes packages and secretes proteins? Not Answered

- A) Golgi apparatus
- B) Endoplasmic reticulum
- C) Mitochondria
- D) Cell wall

59. Which of the following takes place under normal conditions as electrons flow down the electron transport chain of the mitochondria? Not Answered

- A) NADH and FADH₂ are oxidized
- B) The pH of the matrix increases
- C) The electrons lose free energy
- D) An electrochemical gradients is formed

60. In the processes of photosyntheses light is necessary to: Not Answered

- A) Split carbon dioxide
- B) Releases energy
- C) Combine CO₂ and H₂O
- D) Produce ATP and a reducing substance

61. Which of the following is not an industrial use of bacteria? Not Answered

- A) Recycling of minerals through ecosystems
- B) Food processing
- C) Genetic engineering
- D) Waste water treatment

62. Carbon cycle is important in nature because: Not Answered

- A) The amount of energy before and after a reaction must be the same
- B) It continuously reuse and recycles carbon in the ecosystem.
- C) It consumes oxygen and nitrogen in the atmosphere.
- D) It is used in energy capture and recapture.

63. Which of the following is essential in order for a virus to replicate? Not Answered

- A) The capsid must enter the host cell cytoplasm
- B) The host cell must be undergoing mitosis
- C) The host cell must lack cell membrane.
- D) The genome must be released in to the cytoplasm

64. Which one of the following NOT in situ conservation of Biodiversity? Not Answered

- A) Botanical garden ✓
- B) Sanctuary
- C) Biosphere reserves
- D) National parks

65. Which one of the following represent the population growth curve of a species with limited resources?

Not Answered

- A) Logistic
- B) Exponential
- C) Long normal
- D) Competitive exclusion ✓

66. One goat is heterozygous, long hair(Rr), and its mate carries homozygous short (rr). What is the probability of the offspring having short hair? Not Answered

- A) 25%
- B) 100%
- C) 75%
- D) 50% ✓

67. The type of enzyme used in recombinant DNA technology to spilt a specific sugar phosphate bond in each strand of a DNA double helix is called: Not Answered

- A) Esterase
- b) Restriction enzyme ✓
- C) Lipase
- D) Ligase

68. Lamarck's theory of evolution is know as: Not Answered

- A) Natural selection
- B) Survival of the fittest
- C) Mutation theory
- D) Inheritance of acquired characters ✓

69. Habituation and imprinting illustrate that behaviors are made up of: Not Answered

- A) Reversible stimulus-response learning
- B) Unchanging response to present stimuli
- C) Both innate and learned components
- D) Simple response to complex stimuli ✓

70. The evolution of species which is based upon the sum total adaptation changes could be preserved by:

Not Answered

- A) Natural selection ✓
- B) Speciation
- C) Human conservation
- D) Isolation

71. Based on differences in DNA which of the following animals is closer to human beings? Not Answered

- A) Frog
- B) Domestic pig ✓
- C) Zebra fish
- D) Domestic chicken

72. To which group of sugar can the molecule dihydroxyacetone be classified ? Not Answered

- A) Hexose sugars
- B) Pentose sugars
- C) Triose sugars ✓
- D) Oligosugars

73. Choose the one in which the human digestive enzyme is INCORRECT matched with the substance that it normally catalyzes. Not Answered

- A) Lipase-fat
- B) Pepsin-protein
- C) Trypsin-starch ✓
- D) Pancreatic amylase-starch

74. The organelle of the cell which is concerned with the synthesis of lipids in addition to being associated with carbohydrate metabolism and detoxification is: Not Answered

- A) Golgi body/apparatus
- B) Thylakoid membrane
- C) Rough endoplasmic reticulum
- D) Smooth endoplasmic reticulum ✓

75. Where is convergence point for the metabolism of the building blocks of carbohydrates lipids and proteins Not Answered

- A) Cytoplasm
- B) Krebs cycle ✓
- C) Calvin cycle
- D) Electron transport

76. Among the following crops, which one uses a non-C₄ photosynthetic pathways? Not Answered

- A) Maize
- B) Sorghum

- C) Pineapple ✓
- D) Sugarcane

77. Which of the following is responsible for rapid evolution in RNA viruses? Not Answered

- A) High stability of its RNA
- B) High mutation rate of its RNA ✓
- C) Reverse transcription of its RNA
- D) Accurate replication of its RNA

78. What major consequence does primary ecological succession involve normally? Not Answered

- A) Complexity of food webs increases ✓
- B) Number of species present decreases
- C) A biotic factor become less favorable
- D) Habitats become harsher and deteriorate

79. How quickly a population would increase or decrease in size is probably least influenced by the presence of: Not Answered

- A) Adequate supply of oxygen
- B) Disproportionate human races ✓
- C) Severe inter-specific competition
- D) Carnivores and herbivores

80. Among the theories about the origin of life which one better agrees with the concept of change in organisms and their genetic composed over generation being caused by meiosis, hybridization, natural selection or mutation? Not Answered

- A) Cosmozoan theory
- B) Biochemical origin theory ✓
- C) Special creationism's theory
- D) Spontaneous generation

81. Which of the following is the most accepted theory about the origin of life on earth? Not Answered

- A) Theory of spontaneous evolution
- B) Theory of chemical evolution ✓
- C) The cosmic theory
- D) Theory of special creation

82. What is the possible cause or isolating mechanism for the formation of allopatric species? Not Answered

- A) Seasonal isolation
- B) Temporal isolation
- C) Behavioral isolation
- D) Geographic isolation ✓

83. Which of the following statement about instinctive actions is NOT true? Not Answered

- A) Are innate.
- B) Are adaptive
- C) Require learning ✓
- D) Have fixed pattern

84. What dose a low value for Simpson's index of diversity normally indicate to the researcher?

Not Answered

- A) An area with high number of endemic species
- B) An area dominated by one or just a few species ✓
- C) A biodiversity hotspot wit abundant species
- D) An area with plants but no species of animals

85. A country with a high youth population but a low old age population and low infant population shows

Not Answered

- A) A population pyramid with bulge in the middle ✓
- B) A population with wide base and narrow apex
- C) A inverted pyramid
- D) A pyramid assuming a rectangular shape

86. Which one of the following is the primary contribution of Darwin to biological theory? Not Answered

- A) An important mechanism of biological evolution is natural selection ✓
- B) New alleles arise through mutation
- C) Evolution is the change in gene frequencies over time.
- D) Genes are the units of inheritance.

87. Retroviruses are able to reverse transcribe RNA to DNA in order to: Not Answered

- A) Command the host cell in the production of genomes similar to that of the hosts.
- B) Control the formation of viral protein and RNA that can be assembled in to new virus particles. ✓
- B) Replicate without any interruption
- D) Control the formation of viral protein and DNA that can be assembled in to new viral particles

88. Which of the following nucleotide sequences contains four pyrimidine bases? Not Answered

- A) GATCAATGC ✓
- B) UAGCGGUAA
- C) GCUAGACAA
- D) Both B and C

89. Significant change in Ph that can affect an enzyme molecule include Not Answered

- A) Building strong ionic bonds leading to stabilization of enzymes
- B) Altering the charges on some substrates making it difficult to bind to enzyme ✓

- C) Changing the color and palatability of food items
- D) Increasing the boiling temperature of the substrate

90. Which of the following two elements are found in all organic molecules? Not Answered

- A) Carbon and oxygen
- B) Carbon and nitrogen
- C) Carbon and hydrogen ✓
- D) Carbon and PHOSPHORUS

91. If two molecule of a six carbon sugar are condensed to form a disaccharide, which of the following is the correct molecular formula of the disaccharide? Not Answered

- A) $C_{12}H_{24}O_{12}$
- B) $C_6H_{12}O_6$
- C) $C_{12}H_{24}O_{12}$
- D) $C_{12}H_{22}O_{11}$ ✓

92. Which of the following is NOT a requirement for a molecule to directly diffuse across the cell membrane?

Not Answered

- A) Small size
- B) Non-polarity
- C) Large size and polarity ✓
- D) Lipid solubility

93. Which of the following molecules can provide the cell the least amount of energy per molecule?

Not Answered

- A) Glucose
- B) Reduced NAD
- C) Reduced FAD
- D) ATP ✓

94. During photosynthesis, which of the following is first step in the transduction of light energy to chemical Energy? Not Answered

- A) ATP formation
- B) Carbon fixation
- C) Photolysiss of water ✓
- D) Glucose formation

95. Which of the following terms specifically refers to an ecological succession that starts in an aquatic environment? Not Answered

- A) Xerosere
- B) Hydrosere ✓
- C) Primary succession

D) Secondary succession

96. Suppose the age pyramid of population has a broad base with a narrow top, which of the following is NOT true about the population?

A) It is fast growing

B) It has high growing ✓

C) It is dominated by young people

D) It has a high birth rate

97. What is the reason that Stanley Miller excluded free oxygen from the Mixture of the gases that he used for his simulation experiment?

A) Early organic molecules did not contain oxygen

B) Oxygen cannot react with the rest of the gases

C) Primitive atmosphere was reducing ✓

D) The primitive atmosphere was full of oxygen

98. Which of the following organic molecules is least informative about the evolutionary relationships between species

A) Carbohydrates ✓

B) Proteins

C) DNA

D) RNA

99. In which of the following ways dose mutation contribute most to evolution?

A) It preserves adaptive genes

B) It creates new alleles ✓

C) It forms a new gene pool

D) It helps genes to recombine

100. A small girl who had observed her mother making a telephone call one day made a call on her own. Which learning behavior dose this exemplify?

A) Insight ?learning

B) Trial and error

C) Latent learning ✓

D) Sensitization
